for courses in intermediate macroeconomics or mba level macroeconomics for managers the fundamental goals of this text are to provide an integrated view of macroeconomics and to make close contact with current macroeconomic events this intermediate macroeconomics text is organized around a set of core chapters followed by three optional extensions the core covers the short run medium run and then long run and is then followed by the three extensions openness expectations and pathologies the book concludes with a section on policy although policy issues are also sprinkled through most chapters the book is known for its global emphasis and empirical applications the third edition has simplified many of the more difficult topics theoretical material is always presented in three ways in words in graphs and with algebra

real current macroeconomic events connected to the theory the new fourth edition of blanchard s respected macroeconomics text has been substantially revised to account for the impact of the gfc on the australasian economy and the many issues it raises thus in addition to a first discussion of the crisis in chapter 1 and numerous boxes and discussions throughout the book we have brought forward the chapter on the gfc to chapter 9 macroeconomics is the only intermediate resource with a truly australasian focus demonstrating economic ideas and issues with hundreds of local and international examples this comprehensive resource presents an integrated view of macroeconomics drawing on the implications of equilibrium conditions in three sets of markets the goods market the financial markets and the labour market

a unified view of the latest macroeconomic events in macroeconomics blanchard presents an integrated global view of macroeconomics enabling students to see the connections between goods markets financial markets and labor markets worldwide organized into two parts the text contains a core section that focuses on short medium and long run markets and two major extensions that offer more in depth coverage of the issues at hand from the major economic crisis that engulfed the world in the late 2000s to monetary policy in the us to the problems of the euro area and growth in china the text helps students make sense not only of current macroeconomic events but also of those that may unfold in the future integrated detailed boxes in the 8th edition have been updated to convey the life of macroeconomics today reinforce lessons from the models and help students employ and develop their analytical and evaluative skills

the study of macroeconomics can seem a daunting project the field is complex and sometimes poorly defined and there are a variety of competing approaches it is easy for the senior bachelor and starting master student to get lost in the forest of macroeconomics and the mathematics it uses extensively foundations of modern macroeconomics is a guide book for the interested and ambitious student non partisan in its approach it deals with all the major topics summarising the important approaches and providing the reader with a coherent angle on all aspects of macroeconomic thought each chapter deals with a separate area of macroeconomics and each contains a summary section of key points and a further reading list using nothing more than undergraduate mathematical skills it takes the student from basic is lm style macro models to the state of the art literature on dynamic stochastic general equilibrium

explaining the mathematical tricks used where they are first introduced fully updated and substantially revised this third edition of foundations of modern macroeconomics now includes brand new chapters covering highly topical subjects such as dynamic programming competitive risk sharing equilibria and the new keynesian dsge approach

this textbook will give students a fuller understanding of the subject and has been fully updated to provide broad coverage of the financial crisis

the essays in this festschrift have been chosen to honour harald hagemann and his scientific work they reflect his main contributions to economic research and his major fields of interest the essays in the first part deal with various aspects within the history of economic thought the second part is about the current state of macroeconomics the essays in the third part of the book cover topics on economic growth and structural dynamics

carlin and soskice integrate the financial system with a model of the macro economy in doing this they take account of the gaps in the mainstream model exposed by the financial crisis and the eurozone crisis this equips the reader with a realistic modelling framework to analyse the economy both in crisis times and in periods of stability

the ongoing economic crisis has revealed fundamental problems both in our economic system and the discipline which analyses it this book presents a series of contrasting but complementary approaches in

economic theory in order to offer a critical toolkit for examining the modern capitalist economy the global economic crisis may have changed the world in which we live but not the fundamental tenets of the discipline this book is a critical assessment of the relation between economic theory and economic crises how intellectual thinking impacts on real economic events and vice versa it aims at challenging the conventional way in which economics is taught in universities and later adopted by public officials in the policymaking process the contributions all written by distinguished academics and researchers offer a heterodox perspective on economic thinking and analysis each chapter is inspired by alternative theoretical approaches which have been mostly side lined from current academic teaching programmes a major suggestion of the book is that the recent economic crisis can be better understood by recovering such theoretical analyses and turning them into a useful framework for economic policymaking economic crisis and economic thought is intended as a companion to economics students at the master s and phd level in order for them to confront issues related to the labour market the financial sector macroeconomics industrial economics etc with an alternative and complementary perspective it challenges the way in which economic theory is currently taught and offered via alternatives for the future

this study of modern macroeconomics aims to do justice not only to fiscalism monetarism and rational expectations but also to real business cycle theory post keynesianism and the austrian theory of business cycles the material is enhanced by interviews with leading macroeconomists
